

Field Operator, Edson North – Overview

Reporting to the Edson District Production Coordinator, your key accountability will be the safe and efficient operation, care, and control Canlin production assets. The field operator will be responsible for all aspects of gas and oilfield operations in a safe and effective manner including operating sour gas wells, field compression, pipeline pigging, plunger lift systems, monitoring chemical rates, all contributing to a safe working environment for Canlin. You will be required to provide direct guidance and support to consistently meet or exceed expectations in the following areas; production, operating cost, corporate values, environment, health and safety, training, regulatory and emergency response.

Location: Edson Area, AB

Field Operator, Edson North – The Role

This is a full-time role in the Hanlan Robb field and consists of a 7 on 7 off work shift (shift subject to change). This role will support the Hanlan Robb and PECO areas, and occasionally support other assets within the Edson District. The following are key responsibilities:

- Assist the Production Coordinator in the safe and reliable operation of the area's wells and facilities
- Ensure equipment, facilities and wells are maintained to meet throughput requirements
- Demonstrate and uphold all Canlin's rules, guidelines, policies, and procedures applicable to the operation
- Maintain a high level of communication with the IROC, Operations and MRA teams
- Utilize Oplynx to maintain accurate daily equipment logs, records, production readings and all electronic reporting formats
- Requirement to be on-call
- Promote an adaptive, and collaborative environment in the field operations team
- Support district objectives to meet Canlin's goals as a low-cost producer

Please note: This position is within the scope of the collective agreement between Canlin Energy and Unifor Local 508-A. Compensation will be determined as per the collective agreement.
