

## **Environment and Regulatory Summer Student – Overview**

The Environment and Regulatory Summer Student will be a member of Canlin's HSE&S team with a primary focus on supporting the Environmental and Sustainability (E&S) programs. This position will provide technical support in collecting essential data for carbon emission reporting and ensuring compliance with environmental regulations. This position offers an excellent learning experience for individuals interested in the oil and gas industry and environmental regulations. Canlin is looking for an energetic and self-motivated individual willing to work in a fast-paced environment and contribute to our efforts to minimize environmental impact.

**LOCATION:** Calgary

## **Environment and Sustainability Summer Student – The Role**

- Assist in the collection of emission data from our operations.
- Assist in organizing and analyzing the collected data to identify emission trends, deviations from regulatory standards, and areas for improvement.
- Collaborate on the preparation of comprehensive reports and documentation of collected data for regulatory compliance and internal assessments.
- Work closely with our Sustainability team and engineers to ensure data integrity and alignment with our sustainability goals.
- Coordinating with technical staff, contractors, and other field personnel to complete on-site environmental data collection.

## **Environment and Regulatory Summer Student – The Person**

- Currently enrolled in a relevant degree program (e.g., Environmental Science, Environmental Engineering, Chemical Engineering, or related field).
- Strong interest in environmental issues and regulations as the world transition to net zero, particularly within the oil and gas industry.
- Detail-oriented with strong organizational skills and ability to multi-task.
- Ability to work independently and as part of a team environment.
- Strong interpersonal skills and ability to build professional relationships with colleagues.
- Effective communication skills, both written and verbal.
- Proficiency in Microsoft Office applications.
- Previous experience carbon emission quantification principles, climate change science, and industrial processes would be an asset.
- Valid Class 5 driver's license (if required to travel to site).

## **Environment and Regulatory Summer Student – The Company**

Canlin Energy Corporation is a privately held, long reserve life, natural gas weighted producer in the Western Canadian Sedimentary Basin. Our E&P business produces over 40,000 boe per day from predominantly operated wells, infrastructure and facilities. Canlin's key priorities are running a safe and sustainable business, focusing our portfolio, improving productivity, generating value from our midstream assets and investing for growth and value
