

Evaluations Engineer & Reserves Coordinator – Overview

The Evaluations Engineer & Reserves Coordinator is responsible for two primary objectives. Firstly, the successful candidate will be responsible for screening, evaluating, presenting, and recommending potential acquisition opportunities to support enhancement of Canlin's portfolio. Secondly, the individual will be responsible to coordinate the reserves process as the main contact between the Development teams and Canlin's 3rd party Reserves Evaluator. Located in Calgary and reporting to the VP-Business Development, you will work closely with the Business Development and the Development teams to develop and execute strategy on significant projects key to Canlin's ongoing development.

Evaluations Engineer & Reserves Coordinator - The Role

- Evaluate and recommend upstream and midstream business development opportunities
- Screen, evaluate and propose internally generated, proactive business development ideas
- Conduct detailed reviews and evaluations of opportunities once past initial screening
- Project Manager and key point of contact and between 3rd Party Reserves Evaluator and Development teams in the reserves process.
- Maintain knowledge of industry and market trends

Evaluations Engineer & Reserves Coordinator – The Person

- Solid, in-depth knowledge of the oil and gas industry, associated financial drivers and metrics, petroleum economics, and an understanding of current market conditions and opportunities, focused on WCSB
- Reasonable and growing understanding of other oil and gas basins throughout North America
- 10 – 15 years of technical industry experience, including front-line Engineering field experience in Operations, Production or Exploitation
- 3 – 5 years recent business development experience, including exposure to strategy, finance or marketing, and an understanding of oil and gas taxation, regulatory and contract law
- Fully knowledgeable and experienced with the yearend reserves process and can manage this crucial task for the business
- Big-picture thinker who can identify upside and pays attention to detail but understands the level of analysis required
- Goal oriented and results focused, able to manage multiple projects and deliver under tight timelines
- Motivated and team oriented with an appreciation of other disciplines related to both upstream and midstream activities. Demonstrated success in leading people and developing high performance teams is an asset
- Proficient with industry software including Value Navigator and Accumap / GeoScout
- Excellent oral and written communication skills

Evaluations Engineer & Reserves Coordinator – The Company

Canlin Energy Corporation is a privately held, long reserve life, natural gas weighted producer in the Western Canadian Sedimentary Basin. Our E&P business produces over 40,000 boe per day from

predominantly operated wells, infrastructure and facilities. Canlin's key priorities are running a safe and sustainable business, focusing our portfolio, improving productivity, generating value from our midstream assets and investing for growth and value.
