

Exploitation Engineer - Asset Lead - Central Alberta

Overview

The successful candidate, with 10-15 years of oil & gas experience, will work as part of the Development Team to develop depletion strategies, evaluate drilling opportunities and propose strategic business opportunities. You will work in a team environment with geological, land and operational professionals to manage and enhance the assets. The role includes developing a multi-year drilling inventory and identifying new zones and opportunities on a significant operated well and land base. A key function is project management with an emphasis on ensuring timely and cost-effective execution of development projects. You must be proficient in economic evaluation, scenario planning, management presentation preparation and technical writing. The role is based in Calgary and reports to the Exploitation Manager.

Location: Calgary, AB

Exploitation Engineer - Asset Lead - Central Alberta

The Role

- Experience in Central Alberta, sweet and sour gas plants & oil batteries, debottlenecking projects, and joint ventures will be an asset in this role
- Additional experience in the Peach River Arch will also be considered an asset
- Recommend and prepare development plans, prepare budgets, reserves and resource evaluations, and work with corporate development on potential acquisitions and long-range development planning
- Perform technical reviews and provide recommendations on exploration activities
- With guidance and support, manage capital spending projects and ensure they are on time and on budget
- Perform economic analysis of capital projects
- Perform technical writing of investment papers, and champion PowerPoint material, in support of seeking Executive Management approvals for multiple projects throughout the year
- Prepare post investment analysis for projects
- Develop oil and gas reserves by developing a strategy and obtaining approval for multi well drilling projects
- Recommend reactivations of suspended wells and identify and evaluate by-pass pay zones
- Responsible for evaluating the assets and preparing the economic runs for your specific assets. The scope includes liaison with the Independent Reserve Evaluation firm to achieve proper recognition of company assets. You will defend your reserve evaluation to the internal reserve review committee, internal auditors and external auditors.
