

Maintenance Coordinator, Rotating Equipment – Overview

Reporting to the Maintenance Coordinator, Rotating Equipment, you will be responsible for the safe and efficient coordination and planning of maintenance activities for Canlin Energy. As part of the Maintenance, Reliability and Automation (MRA) team you will ensure Canlin Energy has a standard approach to maintenance identification, planning, scheduling, execution, and close-out. You will support Sr Maintenance Lead and liaise with departments including HSER, Technical Services, Supply Chain, and Field Operations.

Maintenance Coordinator, Rotating Equipment – The Role

As part of the MRA team in Calgary you will be immersed in a high-pace collaborative environment with high ownership and accountability over maintenance. The role comes with an in-depth and heavy workload that is highly focused on planned and proactive activities. The team is diverse and leverages each coordinators skills and experience to appropriately challenge the necessity of all activity and cost at our facilities and wellsite's. The outcome of the team environment is better decisions backed with analytical data.

This is a full-time Corporate role based in the Calgary Head office, and consists of a 5-day, 40-hour work week with weekly field supervision required. This role supports the entire Canlin organization as a rotating equipment advisor and is also responsible and accountable for routine rotating equipment maintenance in The Wildcat Hills District, Central District, East, and Hanlan.

- Responsible to maintain processing reliability throughout Canlin Energy assets
- Subject matter expert to support local area coordinators for rotating equipment requirements
- Demonstrate and uphold all Canlin's rules, guidelines, policies, and procedures applicable to the operation.
- Assess, develop, and maintain maintenance procedures
- Responsible for creating, updating and overall management of preventative maintenance plans and schedules pertaining to any rotating equipment in the computerized maintenance management system (CMMS)
- Responsible for coordinating and scheduling preventative maintenance and planned activities pertaining to rotating equipment
- Assist with forecasting and long-term overhaul and major rotating equipment spend and supporting the budgeting process.
- Responsible to liaise with supply chain for vendor management, optimization, and consolidation
- Responsible for consistent and standardized approach for documentation and filing structure
- Responsible to challenge maintenance activity scope to ensure consistent approach across all operational areas
- Responsible to participate in maintenance continuous improvement initiatives
- Responsible to utilize technologies in Canlin's portfolio to improve reliability, communications, and analytics to drive towards data-based decision making

Maintenance Coordinator, Rotating Equipment – The Person

With a high count of active collaborators, the person in this role will require strong relational, interpersonal, and time management skills. New opportunities requiring solutions will be encountered on a daily occurrence and good stress management will be vital.

- Journeyman Certification in Mechanical/Millwright or equivalent certification
- Dual ticket would be considered an asset
- 10+ years of maintenance experience in upstream oil and gas facilities preferred
- 5+ years of experience in CMMS/EAM software preferred
- Experience and strong understanding of gas compression and gathering system impacts
- Experience and strong understanding of pumps used in process facilities
- Experience planning and scheduling in an office environment
- Training or certification in maintenance management (MMP) considered an asset
- High school diploma
- Valid Class 5 driver's license
- Certification in H2S alive, First Aid, WHIMIS, TDG
- Demonstrated ability to adapt to process changes and modifications
- Demonstrated computer literacy
- Proven analytical and problem-solving skills
- Excellent organizational and project management skills
- Ability to work well with others in a fast-paced environment

Maintenance Coordinator, Rotating Equipment – The Company

Canlin Energy Corporation is a privately held, long reserve life, natural gas weighted producer in the Western Canadian Sedimentary Basin. Our E&P business produces over 40,000 boe per day from predominantly operated wells, infrastructure, and facilities. Canlin's key priorities are running a safe and sustainable business, focusing our portfolio, improving productivity, generating value from our midstream assets, and investing for growth and value.
