

## **Instrumentation Technician – Overview**

The Maintenance Instrumentation Technician, will work within an integrated maintenance team of personnel. You will interact with plant and field operations, quality assurance and control, supervisors, coordinators, engineers, and maintenance personnel to perform specific diagnostic and repair services on equipment at the plant and in the field. Reporting to the Plant Foreman, you will maximize the cost efficiency of operations and pursue value-added opportunities to enhance assets. This position requires residence in the Hanlan Robb area of Alberta; staffing center is Edson with company transportation provided.

## **Instrumentation Technician – The Role**

- Perform diagnostic and repair services
- Assist in maintaining complete and accurate related records
- Assess and apply safety procedures and compliance
- Ensure that all safe work policies, standards, codes of practice, and procedures are enforced
- Improve the reliability of operations
- Assist maintenance for operations within the Hanlan Robb area, as well as third party facilities
- Assist with full maintenance process as it relates to safe processing of natural gas

## **Instrumentation Technician – The Person**

- Journeyman instrumentation certificate with inter-provincial red seal required
- Senior experience in an instrumentation role; experience in a sour gas facility
- Experience with DCS, PLC and SCADA systems
- Experience with various analyzers (H<sub>2</sub>S, GC, ADA) would be an asset
- Strong analytical skills with the ability to problem solve; maintenance data gathering, manipulation and analysis
- Strong computer skills required; experience with computer managed maintenance systems
- Complete understanding of maintenance methodology
- Ability to make sound decisions while working with limited supervision
- Demonstrated experience as a team player
- Strong interpersonal and communication skills
- Strong organizational skills
- Dual certification in instrumentation and electrical trades, is preferred

## **Instrumentation Technician – The Company**

Canlin Energy Corporation is a privately held, long reserve life, natural gas weighted producer in the Western Canadian Sedimentary Basin. Our E&P business produces over 50,000 boe per day from predominantly operated wells, infrastructure and facilities. Canlin's key priorities are running a safe and sustainable business, focusing our portfolio, improving productivity, generating value from our midstream assets and investing for growth and value.
