

Plant Operations Coordinator

The Plant Operations Coordinator is responsible for the coordination of projects and maintenance at the Wildcat Hills and Ferrier plants. Reporting to the Manager of Plant Operations, you will be responsible for the safe and efficient completion of maintenance and project work. You will provide direct coaching, guidance, and support to operating staff and contractors to consistently meet or exceed expectations in the following areas: Isolations, risk assessments, organizing job packages, purchasing, maintenance priorities, capital planning, planning integrity items, managing change, hazard management, managing risk, operator training, and outage planning with stakeholders. This position will cover vacation and absences for the Chief Power Engineer at Ferrier and Wildcat plants.

Location: Cochrane or Rocky Mountain House

Plant Operations Coordinator – The Role

- Establish a culture of high performance centered on Canlin's values and business strategy.
- Maintain processing reliability and equipment availability.
- Demonstrate and uphold all of Canlin's policies and procedures applicable to the operation of company assets.
- Process safety improvements.
- Day to day direction of plant personnel for the safe and economical maintenance of a sour gas plant and associated equipment; making changes to meet product control specifications.
- Participation in the plant operational capital and operating budgets.
- Work with Canlins' maintenance team (MRA) in the coordination of scheduled or non-scheduled plant outages and associated work.
- Work with Union personnel to ensure a safer and reliable operation.
- Meet the goals, objectives, and overall performance targets for plant operations
- Some travel required as the plants are located near Cochrane and Rocky Mountain House.
- Participate in the Plant Operations Emergency Response planning and implementation.
- Assess safety procedures and compliance.
- Participate and encourage employee participation in the Canlin's safety program.
- Direct and assist in the development and maintenance of operating procedures.
- Perform Chief Engineer duties when needed
- Monitor the maintenance spend at Ferrier and Wildcat plants

Plant Operations Coordinator – The Person

- Proven leadership ability to manage a team of shift personnel to a high level of safety and operational proficiency to reach goals and objectives.
- 10+ years of experience in the oil and gas industry
- Senior level of experience in NGL recovery and sour gas processing facilities required.
- Minimum 2nd Class Power Engineering Certificate (or significantly working towards)
- Demonstrate an ability to adapt to process changes and modifications.
- Demonstrate computer literacy and knowledge of automated operations systems.
- Excellent communication skills.
- Proven analytical and problem-solving skills.
- Excellent organizational and project management skills.
- Work well with others in a fast-paced environment.

Plant Foreman – The Company

Canlin Energy Corporation is a privately held, long reserve life, natural gas weighted producer in the Western Canadian Sedimentary Basin. Our E&P business produces over 40,000 boe per day from predominantly operated wells, infrastructure, and facilities. Canlin's key priorities are running a safe and sustainable business, focusing our portfolio, improving productivity, generating value from our midstream assets and investing for growth and value.
